1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 112 and 114-117 are rejected under 35 U.S.C. 102(b) as being anticipated by Nosted et al. (6,059,107). Disclosed is a ready-to-use hydrated hydrophilic catheter assembly comprising a gas impermeable package (7) containing a hydrophilic coated catheter (1) having an introducer tip (3) and a sleeve (2). The manner the catheter has been hydrated is indistinguishable from the defined structure and cannot distinguish the claimed structure.

As to claim 117, a liquid sequestering element (10) in alignment with the catheter is defined.

3. Claim 113 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. Claims 1-111 and 118-121 are allowed.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Israelsson et al. is the issued patent to a published application previously cited.
